

Tax Calculator for Financial Year 2024-25

By using this tax calculator, you can have the visibility to get a quick view of your annual tax liability toward **Old Tax Regime** V/s **New Tax Regime**, which will also be helpful in deciding which tax regime suits you the best.

Gross Salary shown in tax calculator has computed basis on considering employee's previous month's actual salary which also include all variable payments paid in till previous month and applicable perks during the FY.

Your actual Tax liability could be differ based on actual & additional variable payment and paydays, if applicable, which will be part of employee's final respective month Payroll cycle.

All employees are advised to check their tentative annual tax liability by using Tax Calculator before submitting their Investment declaration for current FY.

Use of Tax Calculator has described hereunder:

Step 1: Access “Tax Calculator” in Payroll section on Employee Portal.

Step 2: The employee will be able to see different sections under which taxes exemptions are provided. Employee has to enter details in each section by clicking on down arrow of each to finally check the taxable amount under old and new regime.

Click on drop down arrow to view the basis of Net Taxable Salary

Step 11: Post calculation, the employee must go to the Investment Declaration Page under Payroll option on employee portal, choose the tax regime for FY 2024-25 and submit your investment declaration.

Note: The tax calculator does not save any amount entered for investment proof declaration exercise. For Investment declaration, the employee will have to enter the details under that section. Tax Calculator only helps the employee to analyze which tax regime to opt for.
